

User Acceptance Test (UAT) Document – KUCampus Bite Project

1. Document Details

Project Name: KUCampus Bite

Prepared By: Neha Rehan

Date: 28/10/2025

2. Purpose of UAT

- To validate that the KUCampus Bite system meets user requirements.
- To ensure menu listings, orders, and delivery processes work correctly.
- To verify that user interfaces (for students, user, and admins) are responsive and user-friendly.
- To confirm order accuracy and performance efficiency.

3. Scope

Functional Tests:

- Menu browsing, order placement.

Non-functional Tests:

- System performance, response time, and ease of use.

4. Test Scenarios

S.No	Test Scenario	Test Steps	Expected Result	Status (Pass/Fail)
UAT-01	User Login	Enter valid student/admin credentials	Dashboard loads successfully	Pass
UAT-02	Browse Menu	Select canteen and view menu items	Menu displayed correctly	Pass
UAT-03	Place Order	Add items to cart and confirm order	Order placed successfully	Pass
UAT-04	Admin Update Menu	Admin adds new menu item	Item visible to students instantly	Pass

S.No	Test Scenario	Test Steps	Expected Result	Status (Pass/Fail)
UAT-05	Admin Report Generation	Generate daily order report	Accurate report generated	Pass
UAT-06	Response Time	Perform order placement	System responds within 3 seconds	Pass

5. Tester Reviews

- **Tester 1:** “The process of placing an order was quick and seamless.”
- **Tester 2:** “The interface is intuitive and easy to navigate.”

6. Test Data

- User roles: Student, Admin
- Testing Performed By: *Cantech Team* and their close friends.

7. Roles & Responsibilities

- **Testers:** Students
- **Project Manager:** Review and approve UAT results
